EDUCATION

- Bhagwan Parshuram Institute of Technology** Delhi, India
B.Tech in Information Technology; CGPA: 9.02 July 2023 – June 2027

WORK EXPERIENCE

- Mappls ([Certificates](#))** Remote
AI Intern June 2025 – September 2025
 - Built an Indian Address Parser converting unstructured data into structured JSON (house no., locality, city, state, PIN), processing **10K+** addresses.
 - Designed a rule-based parsing engine using regex, heuristics, and tokenization for noisy address formats.
 - Integrated NER enhancements (spaCy + RAG pipelines), improving parsing accuracy to **~90%**.
 - Preprocessed and validated data using external datasets, reducing errors by **~85%** and improving reliability.
- Eterna Infotech Pvt. Ltd. ([LOR](#) & [Certificates](#))** Remote
Software Developer Intern Nov 2024 – Feb 2025
 - Developed the front-end of the MTS LMS (10K+ users), building scalable and user-friendly interfaces.
 - Implemented gamification features (badges, progress tracking, rewards) to improve engagement and retention.
 - Built a responsive dashboard across devices, improving user efficiency by **25%**.
 - Resolved production bugs and optimized performance, boosting stability and user interaction by **35%**.

ACHIEVEMENTS

- Grand Finalist** – [Smart India Hackathon \(SIH\) 2025](#), **Top 5 out of 68,000+ teams nationwide**.
- Winner** – [IIT Delhi Mappls Hackathon \(Tryst 2025\)](#), among **720+ teams**; also won **5+ national-level hackathons**.
- Competitive Programming** – Solved **350+ DSA problems** across [LeetCode](#) and achieved **2 Star rating (Max: 1440, top 30%)** on [CodeChef](#).
- Content Creation** – Published **10+ DSA videos** on [YouTube \(CodeWithAP\)](#), explaining optimized [LeetCode](#) solutions.

PROJECTS

- INDIAN ADDRESS PARSER** | Python, FastAPI, spaCy, Regex, REST API, Pandas | [Code](#)
 - Developed a Python-based address parsing system to convert unstructured Indian addresses into structured JSON fields using regex and NLP (spaCy), handling **10K+** real-world inputs.
 - Designed a PIN-code anchored parsing pipeline using a 155K+ dataset to infer city, district, and state, improving data completeness and accuracy.
 - Implemented advanced preprocessing (abbreviation expansion, noise removal, fuzzy matching) to handle inconsistent address formats.
 - Built a scalable **FastAPI backend** with bulk parsing (500 requests) and confidence scoring, achieving **~90%** accuracy and improving efficiency by **~85%**.
- TRACKFLOW** | React, Node.js, Express.js, MongoDB, Redis, RabbitMQ, bcrypt, Docker | [Code](#)
 - Streamlined job application workflows by building a full-stack platform using **React, Node.js, and MongoDB**, reducing candidate management overhead and increasing application speed by 25%.
 - Containerized 4 microservices using **Docker & Docker Compose** to ensure 100% environment parity, eliminating deployment configuration errors and environment drift.
 - Reduced database load by **60% using Redis caching**, ensured high availability, and improved API response time by **10% by offloading tasks to RabbitMQ-based asynchronous workers**.

TECHNICAL SKILLS

Programming Languages: C++, Java, JavaScript, TypeScript, Python, SQL

Frameworks & Technologies: React.js, Next.js, React Native, Node.js, Express.js, FastAPI, REST APIs, WebSockets, Tailwind CSS

Databases & Tools: MongoDB, MySQL, Git & GitHub, Docker (Foundational), AWS (Foundational), Postman, Vercel

Core CS & AI: Data Structures & Algorithms, System Design, DBMS, Operating Systems, Computer Networks, OOP, LangChain, RAG Pipelines, LLMs, Transformers

VOLUNTEER EXPERIENCE

- Project Chair – Drishti (Rotaract Club of BPIT):** Led Project Shakti, organizing menstrual hygiene awareness drives and pad distribution initiatives across underserved communities.
